

- 264 On the expressway, drive at a steady speed close to the speed limit of the expressway or the limit of your vehicle and keep a safe following distance between you and the vehicle in front. The speed limits of most expressways are 80 km/h and 90km/h. The speed limit of the KPE is 70 km/h or 80 km/h.
- 265 Observe the speed of your vehicle by glancing at the speedometer at regular intervals. Do not race with other vehicles or weave in and out of traffic.

- 266 Do not use the right outermost lane unless overtaking another vehicle; it is meant for emergency vehicles and overtaking. If you do use it, return to the inner lane as soon as it is safe for you to do so.
- 267 Slower moving vehicles should keep to the left and not 'hog' the centre lanes. Road hogging holds up traffic and slows its flow; it also causes other faster moving vehicles to overtake dangerously on the left.

- 268 Do not stop or park on the expressway, including on the road shoulders. It is an offence to drive on the road shoulder of the expressway.
- 269 You may stop or park your vehicle on the road shoulder of the expressway in the event of a breakdown or accident.

- 270 Do not let down or pick up passengers on the expressway.
- 271 When leaving the expressway, plan your exit early, signal left and move into the left inner lane. Once you are on the deceleration lane, slow down to a speed suitable for the road you are joining. If you miss an exit, do not reverse but carry on to the next exit.
