

- 124 After you have stopped at the red light, pull up the handbrake to prevent any accidental movement.

- 125 When turning left or right at a signalised junction, remember that the pedestrian crossing lights on your left and right may also be green to allow pedestrians to cross the roads to your left and right. Proceed cautiously and if there are pedestrians give way by coming to a complete halt. Proceed only when the pedestrians have cleared your path. Never make a turn in the face of a pedestrian.
