

(c) If you are turning right, you must give way to traffic going straight from all directions, as well as traffic turning right from the right and traffic turning left from the opposite direction.

SAFETY PRECAUTIONS WHEN PASSING A JUNCTION WITH TRAFFIC CONTROL

163. At most junctions, the lanes are individually marked for specific directions. Always obey the lane markings. If you are not in the correct lane for the chosen direction, do not change lane suddenly. Get into the correct lane early.

- A. When turning right into a 'shared' lane for turning right and going straight, signal early so that straight-going vehicles from behind can take an alternate lane to proceed.
- B. When going straight, avoid using the 'shared' lane so as not to obstruct vehicles turning right when the traffic light changes to 'red' for vehicles going straight.

164. Do not accelerate when you are approaching a signalized junction. Always be prepared for the signal light to change by reducing your speed. This will give you time to decelerate evenly when the traffic light changes from green to amber.

When the traffic light has just turned amber and you are:

- (a) At 'A' and there is enough distance before the stop line, slow down and stop at the 'stop line';
- (b) At 'B' and you are too near the stop line and you cannot possibly stop safely before the 'stop line', you may proceed.
