

165. In a traffic hold-up, it is courteous to allow vehicles in the minor road to proceed even in the absence of the yellow-box.

- (a) Always stop before the white line. Do not obstruct pedestrians by stopping past the pedestrian crossing line marking.

- (b) When the traffic light facing you turns green, look to the left and right for other vehicles before you start to move off.

At a complex junction where many traffic lights are installed, obey the traffic lights facing you.

SAFETY TIPS - always slow down when approaching junctions and be prepared to give way or stop when encountering danger. Beware of changing traffic lights and vehicles crossing into your path. Beware of cyclist, pedestrians and motorcyclists who are most vulnerable at junctions.

When turning left or right at a signalized junction, remember that the pedestrian crossing lights on your left and right may also be green to allow pedestrians to cross the roads to your left and right. Proceed cautiously and if there are pedestrians give way by coming to a complete halt. Proceed only when the pedestrians have cleared your path. Never make a turn in the face of a pedestrian.

The traffic lights are out of order when the amber lights flash continuously. If this happens, slow down and look out for the other vehicles. Also look out for the police officer who may be controlling traffic and obey his/her hand signals.
