

EXPRESSWAYS

261 Expressways are designed for unimpeded, smoother and faster traffic flow than on ordinary roads. On expressways, you have to react earlier and faster to traffic situations. Therefore, it is very important that you concentrate and be alert while driving on expressways.

262 In order not to impede the smooth traffic flow, the vehicles listed below are prohibited on expressways:

- (a) Bicycles
- (b) Tricycles
- (c) Invalid carriages
- (d) Trishaws
- (e) Motorcycles with side-cars
- (f) 3-wheeled vans
- (g) Low trailers
- (h) Vehicles driven by learner drivers
- (i) Road rollers
- (j) Ready-mix concrete trucks
- (k) Mobile cranes
- (l) Forklifts
- (m) Excavators
- (n) Road pavers
- (o) Tractors
- (p) Dumpers
- (q) Wheel loaders
- (r) Bulldozers
- (s) Graders
- (t) Mobile concrete pumps
- (u) Hydrant dispensers
- (v) Electric bicycles (E-bikes)

263 To join the expressway, signal your intention once you are on the slip road leading to it. Build up your speed to that of vehicles on the expressway so that you can merge smoothly into the traffic stream on the expressway.
