

DRIVING THROUGH JUNCTIONS

112 Many traffic accidents occur at a traffic junctions. It is therefore important for you to analyse situations at junctions quickly and accurately to enable you to select the correct speed and operate your vehicle's controls smoothly. Analysis should be done continuously as the traffic situation is always changing.

Look out for:

- (a) Traffic lights;
- (b) Vehicles travelling across the road;
- (c) Oncoming vehicles;
- (d) Pedestrians waiting to cross, or crossing the road.

Decide on:

- (a) The position to begin signaling;
- (b) The position to begin lane changing;
- (c) Your final position;
- (d) Your turning path.
