

- 114** If you are following behind another vehicle, especially a large vehicle, keep a safe distance. You will not be able to see the traffic lights if you are too close behind a large vehicle.

(a) It may result in a rear-end collision. (b) You may 'beat' the red light inadvertently.

- 115** At most junctions, the lanes are individually marked for specific directions. Always obey the lane markings. If you are not in the correct lane for the chosen direction, do not change lane suddenly. Get into the correct lane early.

- 116** When turning right into a 'shared' lane for turning right and going straight, signal early so that straight-going vehicles from behind can take an alternate lane to proceed.
- 117** When going straight, avoid using the 'shared' lane so as not to obstruct vehicles turning right when the traffic light changes to 'red' for vehicles going straight.
- 118** Do not accelerate when you are approaching a signalized junction. Always be prepared for the signal light to change by reducing your speed. This will give you time to decelerate evenly when the traffic light changes from green to amber.
