

**ROAD USERS AT WORK ZONES**

**Motorists, Motorcyclists or Cyclists**

**211** Take special care to watch out for the warning of the work activity and the obstruction ahead. Be alert of the traffic situation around you.

**212** Observe the orange warning and information signs that are to help you. You must not exceed any temporary maximum speed limit posted at the work zone for your safety.

**213** Get into the correct lane in good time. Do not switch lanes to overtake queuing traffic or move through an area marked off by traffic cones or barriers.

**214** Be careful not to get into the path of traffic entering or leaving the work area. Do not be distracted by the activity in the work area. Concentrate on the road ahead and keep a safe distance from the traffic in front.

**Pedestrians**

**215** Keep away from the work area. Do not enter the work area for convenience or a short cut.

**216** Follow the direction sign for the alternative path provided when the footpath is blocked.  
Do not walk along the traffic lane if it is not designated and cordoned off for pedestrians.

**WORK ZONE SIGNS**

**217** These signs are displayed along the work zone, the section of the road affected by a work activity where temporary traffic control is exercised. These signs contain a black symbol or message with or without a logo on an orange background and are either diamond-shaped for warning or rectangular-shaped for information to the road users. Lateral shift markers are work zone signs that indicate a lateral change in direction of the carriageway or a sharp bend in a road diversion through the work zone.

**218** Typical examples of work zone signs are illustrated below:

Caution Road Users

Works Ahead

Road Narrows  
on Left

Road Narrows  
on Right

Left Lane  
Ahead Closed

Right Lane  
Ahead Closed

Centre Lane  
Ahead Closed
